SinhaTech A Contender for “World’s Best Technology” Title

Local Dolphin-Skin Technology Grabs Attention at the 2009 WBTshowcase

March 17, 2009 | Arlington, TX – SinhaTech was among the top technology innovators from across the nation and around the world presenting at the March 24-25 WBTshowcase in Arlington, Texas.

Sinhatech’s patented Deturbulator Dolphin-Skin technology, which increases truck fuel mileage up to 30% , was rigorously screened and mentored by WBTshowcase commercialization experts to present to an audience including over 100 venture investors and Fortune 500 licensors.

“The revolutionary nature of the technologies presenting at the WBTshowcase makes it a must-attend event for investors and licensing scouts,” said Paul Huleatt, WBTshowcase CEO.

The WBTshowcase is the nation's premier event showcasing the largest collection of undiscovered technologies emanating from the world’s leading universities, labs and research institutions.

“Sinhatech’s strips mimic nature, imparting drag reduction of dolphin skin to trucks”

Each year, just one of the WBTshowcase’s carefully selected presenters receives the "Best of Show" award.

Mr. Huleatt highlighted that the companies groomed to present at the WBTshowcase leave with new knowledge and contact to take their technologies to market and beyond.

The 2008 World’s Best Technologies Showcase brought together over 75 world-class deals and attracted over 450 attendees including over 100 bonafide investors and Fortune 500 licensees.

According to Mr. Huleatt, approximately 1/3 of past WBTshowcase presenters have gone on to secure venture capital or a licensing/strategic partnering agreement with a Fortune 1000 company. To date, past presenters have raised over \$400 million in first (or next) round venture capital.
